Overall Length:

16.750 inches

Overall Height:

5.250 inches

Overall Width:

11.250 inches

Ac Voltage Rating:

115.0 volts and 230.0 volts

Frequency Rating:

48.0 hertz and 440.0 hertz

Electrical Power Source Relationship:

Operating

Indicator Type:

Led readout

Unpackaged Unit Weight:

18.000 pounds

Phase:

Single

Functional Classification:

Aa-3.3

Special Features:

Can be equipped with printer for hard copy recording of long tests

Functional Description:

isolates data communications link problems through six simultaneous measurements: bit error, block error, jitter, total peak distortion, data error skew, counts clock slips and carrier loss or dropout occurrences

Reference Data And Literature:

Hp 1988 catalog

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T263-c
