Inclosure Material:

Aluminum

Overall Length:

17.375 inches

Overall Height:

19.750 inches

Overall Width:

17.375 inches

Frequency Rating:

Between 1.215 gigahertz and 1.37 gigahertz

Power Output Rating:

500.0 kilowatts

Inner Surface Material:

Silver

Power Takeoff Method:

Power take-off from retractable output loop to coaxial cable to microammeter

Tuning Facility:

Provided

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T213-c
