Furnished Items:

10: 1 divider; isolator; 0.001 micro farad blocking capacitor; bnc adapter; gr adapter; microdot adapter; 50-ohm t-connector; ground clip; probe tip; accessory box

End Application:

Series 140 oscilloscope system

Accessory Identifying Number:

10214a model no. And 10216a model no. And 10217a model no. And 10218a model no. And 10219a model no. And 10220a model no. And 10221a model no. And 10213-62102 model no. And 5020-0457 model no.

Unit Type:

Dual channel amplifier

Functional Description:

Plug-in sampling vertical amplifier provides 1milliv/cm deflection factor at 1 ghz; front panel recorder outputs for recorders

Reference Data And Literature:

Manuf 1969 catalog

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
