Mounting Type:

Tripod

Overall Length:

9.000 inches

Overall Height:

9.000 inches

Overall Width:

9.000 inches

Case Material:

Metal

Case Surface Treatment:

Natural

Frequency Range Rating:

+100.000 to 156.000 megahertz and +225.000 to 400.000 megahertz

Accessory Component Quantity:

Exhibit radc-2488

Internal Battery Accommodation:

Included

Output Impedance Rating:

Any acceptable

Voltage Rating:

Any acceptable

Frequency Band Quantity:

2

Modulation Type:

Am

Calibration Accuracy Rating:

Porm 0.005 per cent accuracy

Crystal Controlled Feature:

Provided

Maximum Signal Output:

90 mw maximum output modulated

Signal Output Constancy:

Porm 5 pc maximum variation throughout freq

Modulator Location:

Internal

Modulated Frequency Rating:

105.0 hertz

Modulation Degree:

Any acceptable

Special Features:

Five additional modulated frequency ratings are 125.0 hz nom, 150.0 hz nom., 230.0 hz nom., 300.0 hz nom. And 390.0 hz nom.

Specification Or Standard:

Sg-136 type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T320-j
