Overall Length:

2.500 inches

Overall Height:

1.125 inches

Overall Width:

1.125 inches

End Application:

Type no. An/usm-50

Component Type And Quantity:

1 capacitor and 1 reactor

Special Features:

Components mtd on terminal board which is riveted to chassis; reactor adjusted from bottom; usage design: contains resonant circuit for the oscillator in marker generator; mounting configuration: mounts by 2 thd spade lugs; fsc application data: oscilloscope subassemblies, except specially designed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A5110
