Overall Length:

17.000 inches

Overall Height:

8.750 inches

Overall Width:

19.000 inches

Frequency Rating:

Between 1.0 kilohertz and 50.0 kilohertz

Furnished Items And Quantity:

Adapter connector 1, case test set 1, cord 1, frequency meter 1

Frequency Response Range:

+0.1/+20.0 megahertz

Features Provided:

Internal frequency calibrating crystal

Phase:

Single

Functional Classification:

Aa-6.3

Functional Description:

Precision instrument used to count events within 20 hz to 1 mhz range. Portable, self-contained unit used in checking audio frequencies and in the maintenance of carrier telephone, telegraph, and teletypewriter equipment, to test and measure their generated frequencies

Material:

Steel

Entry Date:

70-11-15

Reference Data And Literature:

Dept of the army publications: tm11-6625-218-12, 11 jun 59; tm11-6625-218-35 w/change 1 and 4, 8 jan 60; tm11-6625-218-45p, 13 nov 64

Relationship To Similar Equipment:

DF)W-HE-NEX-HAUS

Type/model Designation:

An/tsm-16

Fsc Application Data:

Frequency meter, electrical

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:
