Overall Length:

6.500 inches

Overall Width:

4.000 inches

Component Type And Quantity:

2 gear and 1 housing

Special Features:

depth: 5.500 inch; component type and quantity: clutch assembly 1; shaft frequency corrector 1; shaft frequency drum 1; shaft lead screw 1; usage design: actuates tuning capacitor and frequency indication drum; mounting method and configuration: four studs with clearance holes for four no. 8-32 machine screw

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A5110
