Inclosure Material:

Silver-plate and rhodium flash

Overall Length:

3.250 inches

Overall Height:

7.965 inches

Overall Width:

6.965 inches

Frequency Rating:

Between 1.245 gigahertz and 1.355 gigahertz

Power Takeoff Method:

Power take-off from coaxial resonant line short-circuited at one end

Tuning Facility:

Provided

Fsc Application Data:

Radar set group, except airborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T213-c
