Circuit Current For Which Designed:

Ac

Frequency Rating:

Between 50.0 hertz and 400.0 hertz

Operating Voltage Rating In Volts:

Between 115.0 ac and 220.0 ac

Phase:

Single

Special Features:

Bench model; input impedance rating: 10 kohms; includes x-y recorder

Reference Data And Literature:

To33a1-11-9-3

Supplementary Features:

Vibration meter used with self generating linear or torsional velocity transducer to check or monitor vibrations in rotating machinery such as turbines and engines

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A310a0
