Overall Length:

9.000 inches

Overall Height:

8.750 inches

Overall Width:

19.000 inches

Current Type:

Ac

Frequency Rating:

Between 50.0 hertz and 410.0 hertz

Voltage Rating:

115.0 pounds per hour wet

Fixed Frequency Rating:

30.000 hertz and 1020.000 hertz

Functional Classification:

Bb-1.5

Functional Description:

Designed to facilitate test and adjustment of the conventional airborne vor navigation receivers

Entry Date:

80-12-15

Reference Data And Literature:

T.O. 33a1-8-858-3

Relationship To Similar Equipment:

6625-01-012-3296

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T320-j
