Width:

Between 31.000 inches and 47.000 inches

Ac Voltage Rating:

115.0 volts

Frequency Rating:

Between 60.0 hertz and 400.0 hertz

Major Components:

Differential voltmeter, vortex air cooler, wave analyzer

Depth:

Between 30.000 inches and 44.000 inches

Accessory Component Quantity:

3

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Not included

Inclosure Feature:

Multiple item w/ multiple housing

Test Type For Which Designed:

Power

Phase:

Single/three

Height:

Between 45.000 inches and 57.000 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
