Inclosure Material:

Copper

Overall Length:

5.500 inches

Frequency Rating:

Between 1.067 gigahertz and 1.108 gigahertz

Overall Diameter:

2.688 inches

Power Output Rating:

300.0 milliwatts

Inner Surface Material:

Silver

Power Takeoff Method:

Coupling loop to waveguide

Tuning Facility:

Provided

Fsc Application Data:

Pulse analyzer testing

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T213-c
