Overall Length:

3.796 inches

Overall Height:

0.531 inches

Overall Width:

1.843 inches

Component Type And Quantity:

16 capacitor and 8 coil and 8 diode and 14 resistor and 2 socket

Special Features:

Mounting method and configuration: bolted to chassis, four 0.111 inch diameter mounting holes, irregularly spaced; major components: printed circuit board 1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
