Overall Length:

3.796 inches

Overall Height:

0.531 inches

Overall Width:

1.000 inches

Component Type And Quantity:

6 capacitor and 2 coil and 3 diode and 10 resistor and 1 socket

Special Features:

Mounting method and configuration: bolted to chassis, three 0.111 inch diameter mounting holes irregularly spaced; major components: printed circuit board 1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
