Overall Length:

2.830 inches

Overall Height:

1.400 inches

Overall Width:

1.850 inches

Component Type And Quantity:

8 capacitor and 1 cover and 1 housing and 5 transistor

Special Features:

Pmajor components: jack, tip 4; plate, base assembly 1; plate, identification 1; resistor, fixed 20; resistor, variable 2; mounting method: one 0.138 inch diameter securing bolt; stability and gain adjustment screws

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A511I0
