Overall Length:

12.250 inches

Overall Height:

4.625 inches

Overall Width:

6.000 inches

Component Type And Quantity:

1 printed wiring board and 2 switch and 2 generator

Special Features:

Wfunctional description: delay permits detail exam of any portion of signal or pulse train by generating accurate controll delay time; cognizant

service: army; reference data and literature: tb9-6625-798-50 hewlett packard co model 166d

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A51110
