Overall Length:

3.062 inches

Overall Height:

5.812 inches

Overall Width:

28.875 inches

End Application:

AN/A-RC-58,-NSN5

Indicator Type:

Dial w/pointer

Installation Design:

Bench

Special Features:

Power ratings: 1000 watts at voltage standing wave ratio (vswr) 1.0, 667 watts at vswr 1.5, 500 watts at vswr 2.0, 333 watts at vswr 3.0 and 250 watts at vswr 4.0; coaxial line 51.5 ohms ; indicating meter: 0-200 ua with 3 scales, 0-10, 0-100 and 0-1000 watts; terminals: male hn connector on rg 214/v cable to transmitter, female hn connector on load terminal; accuracy +/- 10% full scale

Functional Description:

A directional rf measuring device designed to monitor both transmitter and antenna reflection characteristics in the frequency range from 2 to 30 megahertz while the equipment under test is in use

Reference Data And Literature:

T.O. 33a1-13-413-1

Style Designator:

Rectangular surface mtg

Supplementary Features:

Manufacturers name: directional wwattmeter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A310a0
