Teletypewriter Test Set - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/6625-00-922-9310

#### Ac Voltage Rating:

Between 105.0 volts and 125.0 volts

# **Frequency Rating:**

60.0 hertz

# Major Components:

Analyzer, teletypewriter signals, generator test message, cable assembly, special purpose, electrical

# **Electrical Power Source Relationship:**

Operating

### Internal Battery Accommodation:

Not included

#### Inclosure Feature:

Multiple item w/housing

#### Test Type For Which Designed:

Signal distortion differential delay rate, bit error rate determination, distoration monitoring

#### Phase:

Single

# Shelf Life:

N/a

#### i v/u

Unit Of Measure:

---

#### Demilitarization:

No

#### Fiig:

T228-a
