Ac Voltage Rating:

115.0 volts

Dc Voltage Rating:

27.0 volts

Frequency Rating:

400.0 hertz

Major Components:

High power signal generator, transponder power, voltmeter

Accessory Component Quantity:

2

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Not included

Material And Location:

Aluminum alloy housing

Inclosure Feature:

Multiple item w /housing

Test Type For Which Designed:

Program; monitor; control

Phase:

Three

Surface Treatment:

Paint

Surface Treatment:

Paint

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
