End Application:

Hp 140a or 141a oscilloscope

Unit Type:

Time domain reflectometer

Special Features:

Mfg name-time domain reflectometer

Functional Description:

Measures cable impedances w/o interference; also tunes antennas for optimum impedance matching

Reference Data And Literature:

33a1-13-335-1

Supplementary Features:

Power supplied by oscscope; c/o fast rise pulse generator, single channel sampler time base generator

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
