Overall Length:

6.000 inches

Overall Height:

4.000 inches

Overall Width:

2.000 inches

Environmental Protection:

Dustproof

Average Life Measurement:

Not rated

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Operating Control Method:

Automatic

Installation Design:

Panel

Control Type:

Remote

Circuit Construction Type:

Solid state

Frequency Per Channel:

400.0 hertz operating channel

Signal Data Type Per Channel:

Output channel discrete voltage

Connection Type And Location:

Terminal block w/screw top

Connection Contact Type And Quantity:

6 terminal block w/screw external

Fsc Application Data:

Test set electronic

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
