End Application:

Tektronix tm 500 series test & measurement system

Unit Type:

Amplifier

Functional Classification:

Aa-3.3

Functional Description:

Applications include amplification, impedance transformation, integration, differentiation and summing; may be used in any tm500 power module

Entry Date:

80-09-01

Reference Data And Literature:

Tektronix inc. 070-1616-00

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-b
