End Application:

VISI-CO-RDE-ROSC

Unit Type:

Amplifier

Functional Description:

Amplifier accepts low level input signals, giving the system a sensitivity of +/- 50 mv to +/- 1 v/div at common mode voltages to +/- 15 v peak

Supplementary Features:

Front panel bnc input connector, maximum input 20 vdc or peak ac

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
