Overall Length:

3.555 inches

Overall Height:

0.612 inches

Overall Width:

2.301 inches

Features Provided:

Electrostatic sensitive

Component Type And Quantity:

7 capacitor and 7 diode and 1 inductor and 1 microcircuit and 13 resistor and 10 thermistor and 2 transistor

Special Features:

Mounting configuration: two 1.775 inch diameter holes with center to center distance of 3.254 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
