End Application:

Prototype lab work; support equipment, c-5, u-2; aircraft, awacs e-3a, eagle f-15; missile, patriot, deep submergence systems programs (dssp)

Criticality Code Justification:

Feat

Special Features:

Weapon system essential

General Description:

1ma to 1 amp sensitivity, 0 to 55deg c, light indicates freq response, single-step current transitions, 4.5 to 18 vdc, input current less than or equal to 75 ma, overvoltage protection-porm 25 vdc

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
