Current Type:

Dc

End Application:

A-7d support test equipment

Usage Design:

Is precision source of sine, triangle, square, positive pulse and negative pulse waveforms

Supplementary Features:

Waveform frequency is manually and remotely variable from 100 uhz to 5 mhz, symmetry of waveforms continuously adjustable from 1: 18 to 19: 1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T320-j
