End Application:

Radar servo error test set

Special Features:

Input ttl, positive pulse less than 5usec width of period equal to the system prf, outputs, video-variable amplitude 0 to 10v, range gate-4usec ttlpulse bracketing video; assigned name was calibration and test board assembly

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
