General Description:

Consist of three modules, /1/ oscilloscope calibration module ranges, voltage calibrator 0.04 mv to 100v p-p square wave at 100 hz-100 khz and dc, time markers 0.5 ns to 5 sec square wave at 100 hz to 100 khz, rise time 70 ps rise time pulse /2/ meter calibration module ranges, dc volts 0.020 to 1100v, volts ac 1 mv to 1.1 kv from 10 hz to 10 mhz freq response, dc current 10 ua to 2a, ac current 1o ua to 2a at 50 hz, res 1 ohm to 10 mego in decadesteps./3/ interface unit-controller module which operator can manually or program automatically the various measurement and stimuli devices
