Inclosure Type:

Encased

Circuit Construction Type:

Solid state

Frequency Per Channel:

18.0 gigahertz input channel err-100

Impedance Rating Per Channel:

50.000 ohms input channel

Connection Type And Location:

Receptacle, coaxial front and integral cable w/audio plug rear

Special Features:

Option 001 supplies with a apc-7 coaxial input connector

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
