**Overall Length:**

18.500 inches

**Overall Height:**

9.250 inches

**Overall Width:**

12.500 inches

**Ac Voltage Rating:**

115.0 volts

**Frequency Rating:**

400.0 hertz

**Test Item Connection Method:**

Cable and jack

**Phase:**

Single

**Special Features:**

Provides test jacks, protective devices, supplementary loads, interconnecting wiring, switch functions, and mechanical/electrical interface between power supply test set, a/e37t-25, and power supply under test

**Functional Description:**

In conjunction w/ power supply test set provides capability for functional test and fault isolation

**Material:**

Aluminum case

**Fsc Application Data:**

Test set, power supply

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A537k0
