Overall Length:

18.500 inches

Overall Height:

9.250 inches

Overall Width:

12.500 inches

Ac Voltage Rating:

115.0 volts

Frequency Rating:

400.0 hertz

Test Item Connection Method:

Cable and jack

Phase:

Single

Special Features:

Provides test jacks, protective devices, supplementary loads, interconnecting wiring, switch functions, and mechanical/electrical interface between power supply test set, a/e37t-25, and power supply under test

Functional Description:

In conjunction w/ power supply test set provides capability for functional test and fault isolation

Material:

Aluminum case

Fsc Application Data:

Test set, power supply

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A537k0
