Width:

12.000 inches

Depth:

8.500 inches

Special Features:

Ouput signal-frequency range 225 to 399.975 mhz; frequency selection 7000; frequency in 25 khz steps; modulation 30% am w/1 khz tone; power output -80 dbm to -105 dmb in 5 db steps; test set connected to repeater with 2 cables, 1 to antenna port and 1 to power supply drawer of repeater; provides dc power required by line test unit

Height:

15.000 inches

Supplementary Features:

Manufacturers name: test set, repeater, radio

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
