General Description:

Dim 3 ft.H, 4 ft.W, 2.5 ft.D; complement data c/o 1 ea low speed voltage sampler unit, high speed voltage sampler unit, frequency sampler unit, reference frequency standard, waveform generator unit, pulse generator unit, synchro generator unit, rf synthesizer unit, dedicated interface unit; spec feat-major elements of computer/controlled dc to 500 mhz (lf/rf) measurement capability, based on sample-measurement technique, tim (frequency) and amplitude(voltage) measurements are performed, processed and converted to equivalent digital data for computer processing; all stimulus functional elements are selected set-up and routed under program(software) contrby computer-control group; designed for rack mounting

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
