Width:

48.0 millimeters

Ac Voltage Rating:

115.0 volts

Frequency Rating:

60.0 hertz

Depth:

44.0 millimeters

Electrical Power Source Relationship:

Operating

Phase:

Single

Special Features:

2installs in 19 in. Rack console; provides signals, terminations and sensory ports for fault correction/verification; contains all special cables required for major component interconnection and for interconnection of units under test to test set

Functional Description:

Programmable test designed to test and exercise line replaceable units

Height:

71.4 millimeters

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
