**General Description:**

Input signal analog voltage or bcd digital; sampling period 5, 15, 30, 60 min; 65 discrete signals; resolution 1 degrees wind direction, 1 part in 1000 for digital applications; accuracy digital porm 1 degrees or 0.5 pct., analog porm 2 deg; output 0-5 v; output range 0-100 degrees equals 0-5 v

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
