Recording Method:

Paper

Information Recorded:

Max acceleration, maximum velocity, time

Special Features:

Mfg name-bump recorder

Functional Description:

Used to determine shock/vibration environment during movement of fragile weapon system components

Supplementary Features:

3 axis; digital print-out; 18 day battery power supply; external power supply for longer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T198-a
