Special Features:

Synchro and resolver angle indicator for use with test equipment, resolution 0.01 degree, accuracy porm 0.03 degree, angle range 000.00 to 359.00 degrees or continuous rotation, transformer isolated reference and signal inputs, digital signals dtl and ttl compatible, input operating power 115.0 / 230.0 volts rms, 47.0 to 440.0 hz, 12.625 in.L, 9.500 in.W, 1.750 in.H;

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A532n0
