Overall Length:

10.000 inches

Overall Height:

4.000 inches

Overall Width:

12.000 inches

Ac Voltage Rating:

Between 100.0 volts and 240.0 volts

Frequency Rating:

Between 43.0 hertz and 420.0 hertz

Functional Classification:

Aa-9.1

Functional Description:

Used to test a10 power supply module; provides connections to duplicate input/output functions of receiver r-217 (p) /urr

Entry Date:

80-12-15

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A537k0
