Overall Length:

22.000 inches

Overall Height:

6.000 inches

Overall Width:

19.000 inches

Ac Voltage Rating:

200.0 volts

Dc Voltage Rating:

28.0 volts

Frequency Rating:

400.0 hertz

End Application:

An/apy-1

Test Item Connection Method:

Connector

Phase:

Three

Special Features:

Has facility for testing one unit under test

Functional Description:

Used in conjunction w/ boeing power supply test set in maintenance/repair of radar power supplies sub-assemblies

Material:

Aluminum case

Fsc Application Data:

Power supply test set

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
