Ac Voltage Rating:

115.0 volts

Frequency Rating:

60.0 hertz

End Application:

Used to test nsn 5998-01-060-4643 circuit card assembly

Electrical Power Source Relationship:

Alternate operating

Special Features:

Includes 4 indicators, 1 power switch, 4 toggle switches, 6 ft cable

Supplementary Features:

Manufacturers name: test fixture, regulator control

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
