Width:

6.000 inches

Length:

8.000 inches

End Application:

Testing of nsn 5998-01-041-4428 electronic components assembly and nsn 5821-01-050-4940 control

Special Features:

Wconsists of input jacks to power supply to supply 12 vdc to uut; circuit breakers and visual indicators to show vdc as applied to test fixture;

individual switches to select signal levels; bnc connectors to monitor audio-rf output

Height:

3.000 inches

Supplementary Features:

Manufacturers name: test fixture, bit generator

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
