Width:

12.000 inches

Depth:

10.000 inches

End Application:

Used to test nsn 5821-01-050-6911 modulator

Special Features:

Mincludes switches to select various function of input stimuli/test points to measure and observe, potentiometers to vary input stimuli/test points to measure and observe; connections to provide regulated voltages

Height:

3.000 inches

Supplementary Features:

Manufacturers name: test fixture, modulator

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
