Dc Voltage Rating:

5.12 volts

Major Components:

Panel, power supply, circuit card, cables, monitor tipjacks

End Application:

TACA-NT-EST-SET6

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Tacan navigation set signals

Special Features:

Assigned name: test panel, tacan test set; circuit card provides pulse repetition frequency and ternary words

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
