**General Description:**

Frequency tuning range: 2 to 30 mhz either in 1 khz increments or continuously; freq standards: internal, external; freq display: five digit, led display; power on-off switch; power indicator lamp; meter to indicate tuned condition; oper pwr rqmts: 115 vac, 60 hz, single phase, 150 watts; 17.375 in. Lg, 16.000 in. W, 7.000 in. H; rack mtd; monitor set provides both a visual and aural indication of detected signal level; capable of operating in presence of high level external signals during tuning; function: permit accurate off-the-air adjustment of remotely controlled base-tuned antennas without using fixed-frequency rf signals from the transmitter associated with antenna

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
