End Application:

F-16 a/b aircraft

Electrical Power Source Relationship:

Operating

Test Type For Which Designed:

Tests emergency power unit frequency

Special Features:

Consists of 3-phase variable frequency generator; frequency counter; monitor output lamps; line-to-line voltage indicator lamps, combination case; a test panel, adapter cable, and power cable

Reference Data And Literature:

To 33d7-86-26-1

Relationship To Similar Equipment:

BEIN-GR-EPL-ACED

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
