End Application:

Fiber optic power meter, united detector technology model s550

Measurement Range:

-90.0/+3.0 decibels above or below one milliwatt single indicator single range

Special Features:

Black anodized housing; silicon sensor; spectral calibration: 400 to 1150 nm at 50nm intervals; linearity: porm 1 pct; factory set wavelength: 900 nm; reproducibility: porm 0.5 pct

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A310a0
