Indicator Type:

Cathode ray tube and digital display

Installation Design:

Bench

Display Type:

Light emitting diode

Display Digit Quantity:

13

Scale Selection Method:

Switch

Supplementary Features:

Frequency selection test system; c/o 3586a/b selective level meter w/transmission impairment measurement, 85f personal computer w/82903a memory module and matrix rom, software; meets north american bell requirements; tests include pilot levels, carrier leaks and slot noise; wide freq coverage to 32.5mhz

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A310a0
