General Description:

Signal generator: frequency range 0.050 to 26.0 ghz; frequency resolution 1.0 mhz; rf output minus 99 dbm to plus 5 dbm with accuracy of porm 1 dbm; pulse and squarewave modulation 100 hz to 50 khz with fixed point at 1 khz; frequency counter: range 0.500 to 26 ghz with resolution of 100 hz and sensitivity of minus 30 dbm; power meter: range 0.050 to 26 ghz with internal accuracy of porm 1 db and external accuracy of porm 1 db from minus 10 dbm to plus 10 dbm and porm 2 db from minus 10 dbm to minus 30 dbm; monitors output of signal generator or external signals; measures power level differences between signal generator and device under test; power rqmt: 100 to 240 vac at 50 to 400 hz; dimensions: 24 in. Lg; 16.75 in. W; 5.25 in. H; option added: scan modulation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
