Overall Length:

7.000 inches

Overall Diameter:

1.500 inches

Special Features:

Flat configuration. 1.0 cm sq active area. 5 x 10⁻¹³j equivalent noise level. 2 x 10⁻⁶j maximum energy. 5 maximum irradiance. 5 x 10⁻⁵w maximum avg power

Functional Description:

S1 cm sq silicon detector allows measurement of visible and near ir signals with energies as low as 2 x 10⁻¹³j. Standard option (ry) provides optimized 1.06u response and is useful in the characterization of laser target designators

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-h
