Overall Length:

7.000 inches

Overall Height:

4.000 inches

Overall Width:

2.500 inches

Special Features:

Consists of the test unit, 4 size aa alkaline batteries, 4 foot test leads to test gas tubes not accomadated by the built in test receptacle, an instruction manual and a carrying case; voltage meter calibrated from 0-1000 vdc in 25 v increments; dimensions are for the carrying case; includes threaded receptacle for testing all screw in type gas tube arresters with a 1/2" x 20 threaded arrester shell

Functional Description:

Designed to test the performance of all 2- and 3- electrode gas tube arresters; performs breakdown voltage tests and resistance leakage tests on all gas tubes with a breakdown voltage of 1000 vdc or less

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
